Work Experience

- 

Product Design Lead 2021 - 2023
[CloudChipr](#) · Contract

As the Product Design Lead at CloudChipr, I played a key role in overseeing all design aspects for our cost-cutting system designed for DevOps and SRE teams utilizing AWS, GCP, and Azure. I successfully built and managed a team of four designers, established an effective design ecosystem, and contributed to the company's growth and profitability, including securing investment funding.
- 

Product Design Lead 2021 - 2023
[Webb Fontaine](#) · Full-Time

At Webb Fontaine, I took on the role of Product Design Lead, driving a user centric design approach. By building a centralized design team and implementing a customized design system, we achieved remarkable results. I led the successful redesign and improvement of eight products, delivering enhanced user experiences and receiving positive feedback. Additionally, I implemented essential design and collaboration processes, enhancing workflow efficiency and promoting seamless teamwork. Through clear design guidelines and effective collaboration strategies, we achieved optimal productivity and successful project execution.
- 

UX/UI Lead 2020 - 2022
[Material Exchange](#) · Full-Time

During my two-year career journey at Material Exchange, I made significant contributions to its growth and success. I assembled a talented team, optimized processes, established a complex design system, and led the development of the entire product from the first pixel. As a result, the company received a remarkable \$23 million in investment, affirming the value and potential of our digital asset management tool for the fashion industry.
- 

Senior UI/UX Designer 2018
[The Bank Of London](#) · Full-Time

At The Bank of London (TBOL), I worked on a fintech product focused on mobile exchange and crypto wallet solutions. This experience provided valuable insights into digital finance and blockchain technology, enabling me to contribute to innovative solutions in the financial industry.
- 

Senior UI/UX Designer 2017
[Uphold inc](#) · Contract

As a key member of the team at Uphold, a global multi-asset digital trading platform, I held a senior role as a UI/UX designer focused on developing a mobile crypto wallet. Collaborating closely with a talented team, I leveraged my expertise to create intuitive and secure interfaces, enabling users to effortlessly manage their digital assets.
